

FLEX-C-MENT™ SYSTEMS

Creative concrete overlays for walls & floors

Elegant surfaces... job after job.

YODER & SONS CORPORATION

3 Easy Steps

Step 1

Apply scratch coat 1/8" thick.

Step 2

Apply 2nd coat and stamp.

Step 3

Finishing touches & Color.

FLEX-C-MENT'S™ lasting beauty is unlike any other overlay...

- Great profit margins
- Lab proven superior performance on adverse surfaces e.g.: painted, sealed, linoleum, brick, block, wood, dry wall, cracked existing concrete, etc.
- Unlike other coatings, FLEX-C-MENT™ can be applied up to 2 inches or more in thickness on walls creating beautiful surfaces with depth and texture
- Remarkable realism
- Easy to do
- Little prep work saves time and money
- Excellent water-resistance for surfaces like countertops and pool decks
- Interior/Exterior use
- Great for continued business in the winter months for installations on interior walls, countertops, fireplaces, floors, etc.
- Flex-C-Ment's™ specially designed light-weight and insulated mixes allow applications without requiring additional foundations

Finished Product

A Name You Can Depend On

Tested and Proven!

FLEX-C-MENT's™ overlay system has been in testing and development for over twenty-five years evolving into the most uniquely versatile and doable system you can imagine. If you are looking for a great career opportunity involving beautiful surfaces, take the time to see for yourself all that FLEX-C-MENT™ has to offer you.

Preparation Work???

Our system requires no acid etching or bond coat! Just roll our FLEX-C-MENT™ Primer down and trowel or screed your overlay. This saves a whole days work when compared to other systems!

Monthly Training Seminars

Benefits Included in Training Package

- Excellent hands on training
- Special training discounts on product orders
- Jobsite tour of FLEX-C-MENT™ product applications
- FLEX-C-MENT™ Training Manual
- Lunch and snacks

Training seminars are offered for two days and provide a complete "hands on" experience.

FLEX-C-MENT™ SYSTEMS

SETTING THE STANDARD FOR CONCRETE WALL & FLOOR OVERLAY SYSTEMS

- **Our wall products are in a league of their own!** In the multi-billion dollar industry of concrete restoration and beautification, our customers will not find any other wall product that comes close to the functionality and beauty of FLEX-C-MENT™ exclusive products. You will have a competitive edge over those who have not been trained in our products.
- **Amazingly Little Preparation Work.** No extensive pre-cleaning, no acid etching or bond coat needed! Just roll on our FLEX-C-MENT™ Primer and apply your overlay.
- **Flexibility.** Our exclusive overlay cement formulas are really like flexible stone. They allow for normal surface movement reducing the possibility of cracking where other rigid cement and coatings fail.
- **Feet Friendly.** Unlike regular concrete, tile or real stone and brick surfaces, it feels like you are walking on wood, especially in applications over wood sub floors.
- **Incredible bonding to adverse surfaces.** Unlike traditional cement, our systems are easily applied to adverse surfaces e.g.; wood, styrofoam, painted, glazed, sealed, linoleum, etc. Even a cracked concrete foundation is not a problem for the FLEX-C-MENT™ system. This is truly a unique feature.
- **Durability.** FLEX-C-MENT's™ systems have a proven track record of durability and success. They have been rigorously tested by lab chemists and have been applied in construction projects for *over twenty-five years*. Whether in freezing temperatures or sweltering heat, the overlay systems have stood the test of time. The finished products continue to look beautiful after years of exposure to nature's elements.
- **Satisfied Customers.** FLEX-C-MENT™ overlay systems have been installed in many mega-stores, apartment complexes, condominiums, houses, schools and other enterprises. Our large customers such as Wal-Mart stores, are delighted. Our small customers, like individual homeowners, are thrilled.
- **Value.** Our systems are priced reasonably so our customers will be able to afford projects both small and large. Elegance and durability are our highest priority in our products.

Creative concrete overlays for walls and floors.
